Introduction

Where Opportunity Meets Talent

The TTI Success Insights® Talent Insights Report was designed to increase the understanding of an individual's talents. The report provides insight to three distinct areas: behaviors, driving forces, and their integration. Understanding strengths and weaknesses in these areas will lead to personal and professional development and a higher level of satisfaction.

The following is an in-depth look at your personal talents in the three main sections:

Behaviors

This section of the report is designed to help you attain a greater knowledge of yourself as well as others. The ability to interact effectively with people may be the difference between success and failure in your work and personal life. Effective interaction starts with an accurate perception of oneself.

Driving Forces

This section of the report provides information on the why of your actions, which with application and coaching, can tremendously impact your valuing of life. Once you know the motivations that drive your actions, you will immediately be able to understand the causes of conflict.

Integrating Behaviors & Driving Forces

This section of the report will help you blend the how and the why of your actions. Once you can understand how your behaviors and driving forces blend together, your performance will be enhanced and you will experience an increase in satisfaction.

Introduction

Behaviors

Behavioral research suggests that the most effective people are those who understand their strengths and weaknesses, because they can best develop strategies to meet the demands of their environment.

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

In this report we are measuring four dimensions of normal behavior. They are:

- How you respond to problems and challenges.
- How you influence others to your point of view.
- How you respond to the pace of the environment.
- How you respond to rules and procedures set by others.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no, and maybe. We are only measuring behavior. We only report statements which are true and areas of behavior in which tendencies are shown. Feel free to delete any statement from the report that may not apply, but only after checking with friends or colleagues to see if they agree.

All people exhibit all four behavioral factors to varying degrees of intensity.
—W.M. Marston

Sales Characteristics

Based on Samuel's responses, the report has selected general statements to provide a broad understanding of his sales style. This section highlights how he deals with preparation, presentation, handling objections, closing, and servicing. The statements identify the natural sales style he brings to the job. Eliminate or modify any statement that is not true based on sales training or experience.

Samuel wants the authority and responsibility to achieve his sales goals. He may at times tend to overstep his authority if it will help him achieve his goals. He is a self-starter, generally resourceful, and readily adaptable to many sales situations. He finds the actual sales process much more rewarding than completing all the paperwork involved. Although Samuel is good at selling to people who have similar behavioral characteristics, he may be too impatient to sell to a methodical buyer. He loves the challenge presented by sales. He sees it as a great opportunity to compete with himself and others. Samuel sets high sales goals for himself. He sees the benefit of joining organizations as a way to meet his sales goals. He usually enjoys the challenge presented by cold calls. They allow him to use what he considers to be one of his real talents--the ability to sell to anyone at anytime! He prefers to win, respecting winners and those who show persistence.

Samuel may fail to listen to the true objection. In his haste to make a response, the real objection may never be answered. Some buyers are intimidated by Samuel's sales approach. He doesn't intentionally intimidate people, but he may be too blunt and direct for them. He usually dominates a sales presentation. He prefers a fast and to-the-point approach, which may be too sudden and blunt for some buyers. He may display his impatience if the buyer raises too many objections. He wants to close the sale and get on to the next challenge. Samuel may become defensive if he hears objections to a service or product he helped to develop. Samuel's body language may sometimes get him into trouble. He projects a great sense of urgency, which some buyers may interpret as an unwillingness to listen to their needs.

Samuel Sample

Sales Characteristics

Continued

Samuel's natural closing style works extremely well with fast-acting buyers. These buyers appreciate a salesperson who uses the direct approach. Samuel prefers to service his accounts using one of two methods: excellent service for those accounts he likes or those with potential; adequate or poor service for those accounts he doesn't like or with little potential. He usually closes soon and often. He will close many sales the competition has sold but failed to close. He may lose interest in a client once the sale has been completed. His further interest may be based on the client's ability to buy additional products or services. Samuel usually has his favorite close, and he might, therefore, resist using all the closes he knows. He can close so hard that he causes the buyer to think of objections, which may be excuses rather than real objections.

Behavioral Selling

Overview

The Behavioral Selling Overview reflects Samuel's natural and adapted styles within each phase of the Behavioral Selling Model. Samuel's natural style reflects his native, intuitive selling behavior. Samuel's adapted scores reflect the behavior that Samuel believes necessary in each phase of behavioral selling.

The level of effectiveness that Samuel either possesses naturally or is able to modify or "mask" is also shown. The higher the score, the more effective Samuel is at that phase of the sale. The lower the score, the greater challenge Samuel has in terms of delivering specific behavior required for success within that phase.

The amount of difference between a salesperson's adapted and natural styles is also key. The greater the difference, the greater potential for stress.

Behavioral Selling Success

Potential Strengths Or Obstacles

The Behavioral Selling Model is a scientific, professional selling process. The Behavioral Selling Overview outlines Samuel's performance tendencies within each specific phase of the Behavioral Selling Model.

Prospecting: The first phase of the Behavioral Selling Model. It is the phase of the sale where prospects are identified, detailed background information is gathered, the physical activity of traditional prospecting is coordinated, and an overall strategy for face-to-face selling is developed.

In the Prospecting Phase, Samuel MAY have a TENDENCY to:

- Not keep detailed records while gathering information on prospects unless he sees it as leading directly to the sale.
- Be premature in judging the value of a prospect, either good or bad. Sometimes this is based strictly upon a pure surface evaluation.
- Be motivated by a varied range of interests and prefer an ever changing work environment with a variety of people in it.
- Seize the opportunity to make new contacts. He also enjoys competing against himself as well as against others.

First Impression: The first face-to-face interaction between a prospect and the salesperson, this phase is designed to enable the salesperson to display their sincere interest in the prospect, that is to gain positive acceptance and to develop a sense of mutual respect and rapport. It is the first phase of face-to-face trust building and sets the face-to-face selling process in motion.

In the First Impression Phase, Samuel MAY have a TENDENCY to:

- Be reluctant to ask the prospect for permission to ask questions. Instead, prefers to forge ahead with his own agenda.
- Be impatient when selling to the methodical buyer, although he may be very good at selling prospects who have similar behavioral characteristics to his own.
- Launch into a traditional, yet outdated, demonstration of his product or service rather than wait for the appropriate time to make an appropriate application oriented behavioral selling presentation.

Behavioral Selling Success

Potential Strengths Or Obstacles

- Open with a close.

Qualifying: The questioning and detailed needs analysis phase of the face-to-face sale, this phase of the Behavioral Selling Model enables the salesperson to discover what the prospect will buy, when they will buy, and under what conditions they will buy. It is allowing the prospect to identify and verbalize their level of interest, specific wants, and detailed needs in the product or service the salesperson is offering.

In the Qualifying Phase, Samuel MAY have a TENDENCY to:

- Not have the presentation in a logical order.
- Not continue a line of questioning that will allow the prospect to discuss and verbalize their secondary needs and true buying motives.
- Not take the time to actively listen to what the prospect is saying in order to determine what they really need. In addition, is likely to jump too quickly to a recommendation before processing everything that the prospect has to say.
- Want to get things done immediately while correctly, sometimes at a level that may be too intense for the buyer.

Demonstration: Much different from traditional "demonstration" or "product presentation," this phase allows the salesperson to demonstrate their product knowledge in such a way that it fulfills the stated or implied wants, needs, or intentions of the prospect as identified and verbalized in the Qualifying Phase.

In the Demonstration Phase, Samuel MAY have a TENDENCY to:

- Develop highly creative solutions to the prospect's problems. However, these solutions may be too aggressive for some buyers. Needs to stay alert to buying signals and maintain focus on the buyer rather than on himself or his product or service.
- Not devote sufficient time to present his products and/or services adequately.

Behavioral Selling Success

Potential Strengths Or Obstacles

- To try to close the sale prematurely before the prospect is truly convinced. May believe in the outdated "close early and close often" school of selling. In today's world of selling, this can lead to more trouble than to more sales.
- Present the products or services that satisfy his own needs rather than really answering the prospect's true buying motives, time frame for buying, and terms of purchase.

Influence: What people believe enough, they act upon. This phase is designed to enable the salesperson to build value and overcome the tendency that many prospects have to place little belief or trust in what is told to them. It is this phase of the sale that solidifies the prospect's belief in the supplier, product or service, and salesperson.

In the Influence Phase, Samuel MAY have a TENDENCY to:

- Make claims that are beyond the belief of certain types of buyers. Warning: Make no claims unless they can be backed by fact.
- Not take the time to prepare, pack, or check for all materials that are needed to influence the prospect.
- Not allow prospect time to think through what the information really means and how the product or service will solve his problems.
- Loosely "toss around" testimonials of others without providing the facts to support statements.

Closing: The final phase of the Behavioral Selling Model. This phase is asking the prospect to buy, dealing with objections, handling any necessary negotiation, and completing the transaction to mutual satisfaction.

In the Closing Phase, Samuel MAY have a TENDENCY to:

- Resist participation as part of the team, instead prefers to be seen as the leader of the team.
- Take on a large number of outside activities.
- Close soon and sometimes too often. However, he will also be able to close many sales that his competitors are too weak to close.

Behavioral Selling Success

Potential Strengths Or Obstacles

- Use fear as a motive for buying.

The Absence of a Behavioral Factor

The absence of a behavioral factor may provide insight into situations or environments that may cause tension or stress. Based on research, we are able to identify situations that should be avoided or minimized in a person's day-to-day environment. By understanding the contribution of a low behavioral style, we are able to better articulate a person's talents and create environments where people can be more effective.

Situations and circumstances to avoid or aspects needed within the environment in order to minimize behavioral stress.

- The need for juggling many tasks at once may jeopardize quality.
- Avoid emotionally charged situations unless prepared to adapt and control the emotional output.
- Avoid projects that require constant focus without any room for variance in task.

Understanding that the need to adapt is unavoidable at times. Below are tips for adapting to those with S above the energy line and/or tips for seeking environments that will be conducive to the low S.

- Recognize that others may move at a slower pace.
- Rambling, written or verbal, will be avoided to the point of missing a deadline.
- Seek environments where change is rewarded rather than discouraged.

Time Wasters

This section of your report is designed to identify time wasters that may impact your overall time use effectiveness. Possible causes and solutions will serve as a basis for creating an effective plan for maximizing your use of TIME and increasing your PERFORMANCE.

Poor Delegation

Poor delegation usually means the inability to discriminate between tasks needing your time and attention, and those others are capable of accomplishing.

Possible Causes:

1. Do not want to give up control
2. Do not trust the abilities of others
3. Do not understand the abilities of others
4. Fear the talents of others
5. Do not want to overload others

Possible Solutions:

1. Train and mentor others
2. Develop a support team
3. Give people the opportunity to help
4. Recognize the time spent training others on routine tasks will result in gained cumulative time for higher priority tasks

Firefighting

Firefighting is often defined as being pulled away from priority tasks to answer questions, offer solutions, delegate, or solve problem-related minor issues. These issues usually "flare up" quickly and are "put out" quickly.

Possible Causes:

1. Desire to solve problems quickly and sometimes without adequate information
2. Lack of delegation
3. Lack of standard operating procedures
4. Poor or the wrong priorities
5. Failure to scale intensity to the situation

Time Wasters

Continued

Possible Solutions:

1. Establish a plan
2. Create operational procedures for tasks and known problems
3. Establish a "management by objectives" approach

Lack of a Written Plan

A plan in this context may be an overall business plan including mission, goals, objectives, task requirements, and utilization of resources. It may also simply mean written priorities and a written daily plan of action.

Possible Causes:

1. Action oriented, want to get things done now
2. Priorities keep changing (self- or other-imposed)
3. Have been successful without a plan in the past
4. Want to "go with the flow" and not be stifled by a written daily agenda

Possible Solutions:

1. Write down personal and job-related values and prioritize them
2. Write out a long-term plan that will support those values
3. Recognize that by having priorities clearly in mind, constant change will be replaced with change-by-design

Crisis Management

Crisis Management is defined as a management style that is consistently driven by uncontrolled external issues as the preferred method of managing. This style allows crises to precipitate rather than them being anticipating and for the employee to be pro-active.

Possible Causes:

1. Lack planning
2. Place unrealistic time requirements on people and tasks
3. Always looking for problems to solve

Time Wasters

Continued

Possible Solutions:

1. Have a well defined operational plan
2. Target key individuals to handle specific problems
3. Ask for recommendations from key people
4. Delegate authority and responsibility when possible

Snap Decisions

Snap decisions in this context are those decisions that are made too quickly without having all the necessary information.

Possible Causes:

1. Impatience overrides need to wait for more information
2. Try to do too much
3. Failure to plan in advance
4. Lack specific goals

Possible Solutions:

1. Ask for recommendations
2. Establish process for decisions prior to situation occurring
3. Establish standard operating procedures and alternative procedures for possible problems

Areas for Improvement

In this area is a listing of possible limitations without regard to a specific job. Review with Samuel and cross out those limitations that do not apply. Highlight 1 to 3 limitations that are hindering his performance and develop an action plan to eliminate or reduce this hindrance.

Samuel has a tendency to:

- ✓ 1. Not answer objections to a buyer's satisfaction.
- ✓ 2. Take on too many outside activities.
- ✓ 3. Resist participation as part of the team, unless seen as a leader.
- ✓ 4. Not have his presentation in a logical order.
- ✓ 5. Dislike routine work--call reports, etc.
- ✓ 6. Be a situational listener--hears only what he wants to hear.
- ✓ 7. Be weak at providing follow-up service if a client has little potential for future sales.
- ✓ 8. Represent himself with more authority than he may have.
- ✓ 9. Take objections lightly.

The TTI Success Insights® Wheel

The TTI Success Insights® Wheel is a powerful tool first popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree to which you are adapting your behavior.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding, and appreciation can be increased.

Understanding Your Driving Forces

Eduard Spranger first defined six primary types or categories to define human motivation and drive. These six types are Theoretical, Utilitarian, Aesthetic, Social, Individualistic, and Traditional.

With TTISI's additional insights into Spranger's original work, the 12 Driving Forces® came to life. The 12 Driving Forces® are established by looking at each motivator on a continuum and describing both ends. All of the twelve descriptors are based on six keywords, one for each continuum. The six keywords are Knowledge, Utility, Surroundings, Others, Power, and Methodologies.

Think about the driver that you can relate to most and then see how your other primary drivers can support or complement it to create your unique driving force.

1. Resourceful - People who are driven by practical results, maximizing both efficiency and returns for their investments of time, talent, energy, and resources.

2. Intentional - People who are driven to assist others for a specific purpose, not just for the sake of being helpful or supportive.

3. Receptive - People who are driven by new ideas, methods, and opportunities that fall outside a defined system for living.

4. Commanding - People who are driven by status, recognition, and control over personal freedom.

Areas for Awareness

For years you have heard statements like, "Different strokes for different folks," "to each his own," and "people do things for their own reasons, not yours." When you are surrounded by people who share similar driving forces, you will fit in with the group and be energized. However, when surrounded by people whose driving forces are significantly different from yours, you may be perceived as out of the mainstream. These differences can induce stress or conflict.

This section reveals areas where your driving forces may be outside the mainstream and could lead to conflict. The further above the mean and outside of the mainstream you are, the more people will notice your passion about that driving force. The further below the mean and outside of the mainstream you are, the more people will notice your avoidance or indifference regarding that driving force. The shaded area for each driving force represents 68 percent of the population or scores that fall within one standard deviation above or below the national mean.
